MagSi-DNA Animal

*Fast and cost-effective extraction of
genomic DNA from animal samples*

DNA Extraction from Animal Samples

MagSi-DNA Animal allows fast and cost-effective extraction of DNA from various samples like blood, semen, hairs, saliva/swabs or lysed tissue. This universal DNA purification kit is optimized to extract DNA from these sample materials with the highest purity and delivering DNA which is suitable for genotyping assays or other qPCR based analysis. The extraction chemistry is validated on different species, e.g. horse, swine, dog, cattle, fish and shrimp and can be customized to meet any specific requirements of yields, purity, working volumes. The kit can be used on KingFisher™ Flex or similar systems or on many other automated DNA purification instruments.

General Features

- Short protocols, complete processing at room temperature possible (after sample lysis)
- High DNA yield and purity
- Suitable for many genomic applications such as SNP genotyping, DNA sequencing, NGS
- Suitable for parental testing / breeding identity
- Preparation time 96 samples: 20 min after lysis

Quality

- Validated procedures for many sample materials (e.g., blood, semen, saliva, swabs (saliva/oral fluid), hair, lysed tissue)
- High molecular weight and pure DNA suitable for long-time storage
- Efficient removal of PCR inhibitors
